It was not surprising that Recep Tayyip Erdogan announced his intention to break relations completely with Tel Aviv, IN CASE OF Donald Trump recognition of Jerusalem as a perpetuity capital for Israel according to his promises during his campaign.

Even Yassin Aktay, who works chief adviser of Recep Tayyip Erdogan and a member of the Turkish parliament, said during interview Muslim brotherhood channel : now our relations with TEL AVIV IS BROKEN

ALSO Turkish authorities allowed for ten thousands of Turkish and Arab immigrants demonstrating in 40 regions all over turkey in good public media exploitation of the Jerusalem crisis by turkey and its president

Before the populist stepping up , there was another stepping up by the Turkish president, and the spokesman of the presidency IBRAHIM KALAN who revealed the position of turkey against TEL AVIV

All these situations are understandable especially in the context of military and political clashes outside turkey borders with its neighbors whether in Iraq or Syria or even its internal clashes with fathallah Gulen and his group, kurds and its negative impact on the economy and TL falling in addition to diplomatic crisis between Ankara and Washington over HULKBANK and the accusations to ERDOGAN government of money laundering for Tehran.

However, a large part of Islamists especially Egyptians ones are unable to realize Turkish situation interference according to its relations with TEL AVIV with the contradictory tendencies of ERDOGAN statements against Washington and TEL AVIV.

CLARIFICATIONS ABOUT RELATIONS BETWEEN ANKARA AND TEL AVIV:

- After the arrival of RECEP ERDOGAN to the government in 2002 he refused meeting the ambassador of Israel in Ankara although he met all Arab ambassadors telling them about his willing policy in the Middle East, his desire to strength his relations with Arab and Islamic world.
- All previous details deep the political crisis between the two countries especially with TEL AVIV fears after the arrival of erdogan who has Islamic background, which may crushing all historical and military relations between the two countries, but Abdullah Gul's visit to TEL AVIV IN 2005 caused a great reaction inside TEL AVIV as it was the first visit for Turkish minister after that erdogan had visited TEL AVIV also in 2005 which was a new beginning between the two countries.
- However, with little successes achieved by the AK Party and Erdogan, and was able to improve the economic reality in Turkey. He began to create Islamic symbol-

of committing massacres against Palestinians in the Gaza War which ended in 2009 - Last details prompted Turkish citizens to receive their prime minister in Ankara on his return with festivals, as well as increasing popularity in the Arab and Islamic world as the only person who managed to record a victory on front of cameras around the world as a victory for Jerusalem. From here it started the Tayyip Erdogan media phenomenon where strong statements , but in fact turkey did not confirm and agree with these statements , there was two positions and situations inside turkey , one by erdigan , other through reality turkey which insist on strength its relations with TEL AVIV , so following situations explain this details:

1-In May 2010 there was a great crisis between the two countries due to the kill of 9 Turkish people by Israeli commando forces in the freedom flotilla .Turkey has withdrawn its ambassador from Tel Aviv and kept a low representation. Turkish media discourses has risen all over world, although all these details, but Turkish diplomacy was moving in other directions, the Foreign Minister Ahmed Davutoglu tries to restore the relations again with Tel Aviv, so that the government sent planes to extinguish fires that erupted strongly in Tel Aviv as a gesture of goodwill from Oglu to try to restore relations again with Tel Aviv.

2-In addition to secret meetings held by Davutoglu with Israeli representatives to find suitable solutions for the two parties regarding to the Freedom Flotilla to restore relations again

3-Turkey's approval in 2010 to install the missile system on its territory as a NATO orientation, in which Turkey is a member and it was clear from Ankara that the missile system is protection for TEL AVIV against the Iranian missiles

4-The obstacles of Israel-Turkish rapprochement have been disappeared after election and new government

5-Turkey discovered that its boycott with TEL AVIV will forbidden it to play basic role in the Palestinian case especially with the emergence of the Egyptian role in past few years

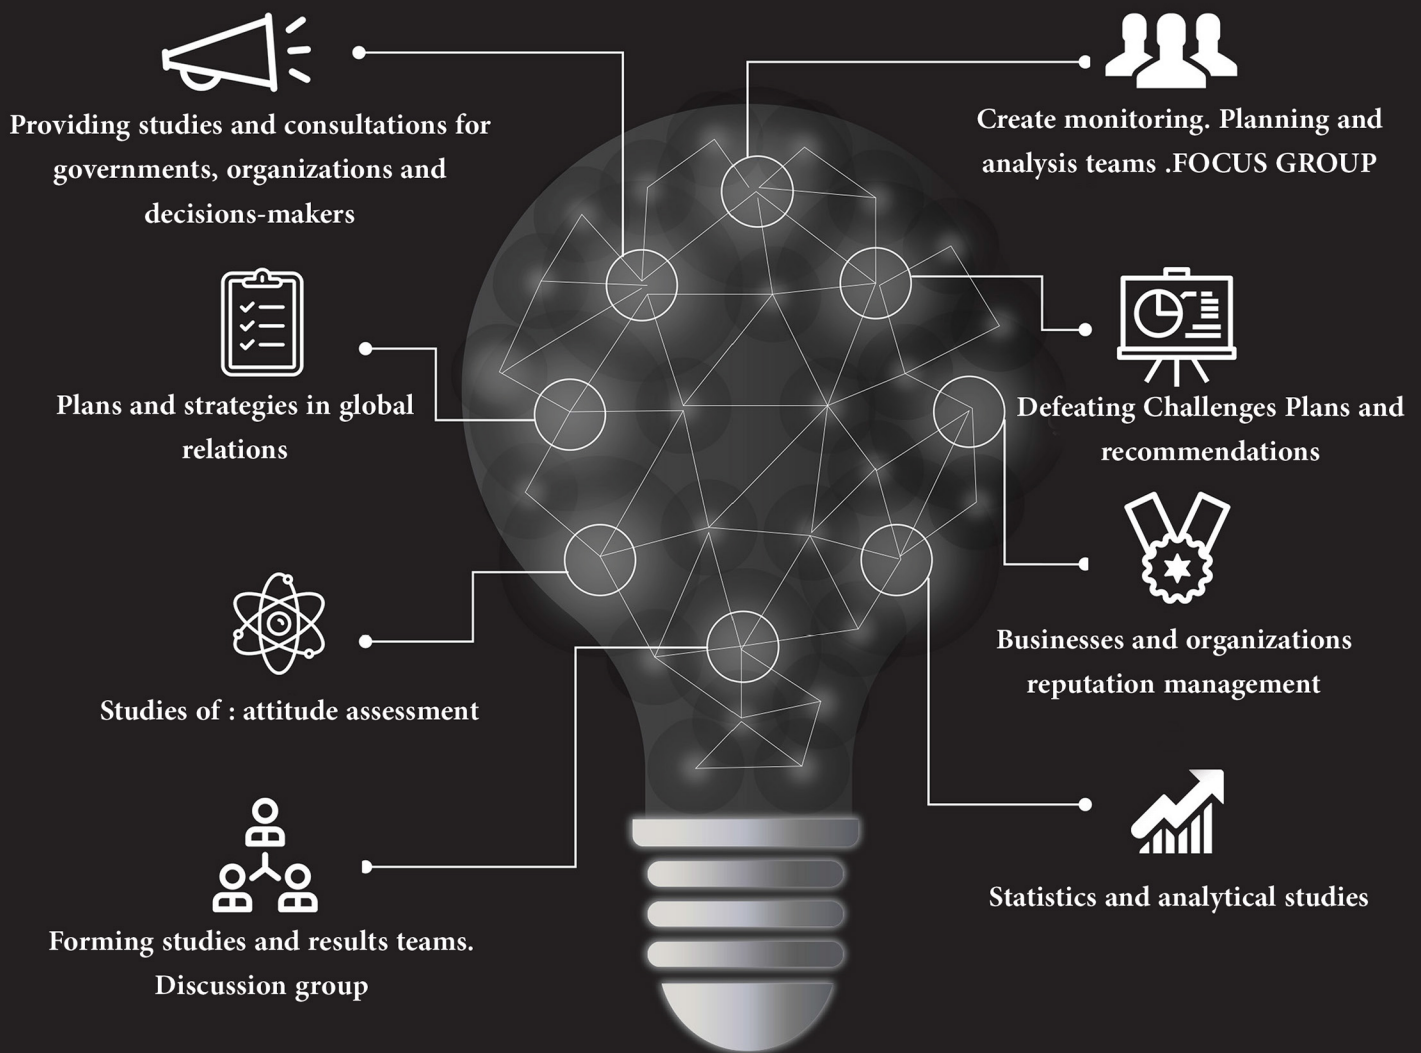

6-The normalizations between two countries was signed in Jerusalem and then in Ankara. In a clear reference to the real recognition of Turkey, including Erdogan, that Jerusalem as the capital Israel, not Tel Aviv

7-As well as the rest items which include security coordination and military intelligence in the region and economic coordination of natural gas

It is noticed that media discourse of Tayeb Erdogan is understood as a part of his attempts to a device feelings of Islamists around the world, especially since he has opened his country's territory to all the Islamists and their supporters and therefore does not want to lose what he seeks to lose what he seeks to create his political and religious symbolism as head of state to care with Muslims all over world .On the other hand, the Turkish state moves according to its real convictions is not interested in Erdogan's symbolism, although there are many evidence that there are great differences between the government and the Justice and Development Party
